

# ECO-Line RP-Motors

Our radial piston air motors reduce your energy consumption about 85%\*.  
 Field of application: Agitators and all other rotating drives. Atex II Kat.2 G&DT5.  
 We would like to explain the possibilities and benefits.

## Technical features

- About 85% less air consumption\*
- About 85% less energy costs\*
- Oil-free driving possible
- Low noise emission, 76-78 db(A)\*
- Constant rotational speed (50-800 rpm)
- High torque (3-28 Nm)
- Silikon-free (Viton-seal)
- Double-bearing flange
- Air connections above & on side (Typ 3)
- Hard-anodized body
- Optional with gearbox
